Corrigendum

Corrigendum to ‘*Serratia nevei* sp. nov. and *Serratia bockelmannii* sp. nov., isolated from fresh produce in Germany and reclassification of *Serratia marcescens* subsp. *sakuensis* Ajithkumar et al. 2003 as a later heterotypic synonym of *Serratia marcescens* subsp. *marcescens*’ [Syst. Appl. Microbiol. 43 (2020) 126055]

The authors regret the incorrect linking of the genome sequence accession number of strains in Table 4 and Table 5.

The draft whole genome sequences of *Serratia* strains for this study have been deposited into DDBJ/EMBL/GenBank under accession number VKLT00000000 for strain S11, VTUO00000000 for strain S2, VOUP00000000 to VOUX00000000 for strains S17, S16, S14, S12, S9, S8, S6, S5 and S3^T, and VTUQ00000000 to VTUT00000000 for strains S10, S13, S15^T and S18.

In Table 4 the type strain *Serratia nevei* S15^T should be linked to the genome sequence accession number as VTUS00000000.

In table 5 the ‘Species epithet’ field of *Serratia bockelmannii* should be changed to “*bockelmannii*”.

The authors would like to apologise for any inconvenience caused.
